

Team Plan

August 1st: Both met together to start on the project. Started the basics of the group chat feature for the client.

August 2nd: Both met up to finish implementing the group chat feature. Started implementing SceneBuilder into the program.

August 3rd: Hans started the private chat implementation. Extensively used SceneBuilder to implement different tabs.

August 4th: Both met up to brainstorm other features. Hans finished private chat implementation. Caton started on other JavaFX features and bug testing.

August 5th: Hans started on extra features such as emoji implementation. Caton worked on proper initialization in login.

August 6th: Both worked on bug testing.

August 7th: Both met up to combine work using GitHub. Hans implemented message sounds when sending a message. Caton fixed up error messages when wrong inputs are used. Both tested the program to run on two separate machines.
